BRAINSTORMING AND IDEA PRIORITIZATION

Project Name: EduGenie

Technology: Google Gemini Generative AI

Project Type: AI-Powered Learning Assistant

1. INTRODUCTION

EduGenie is a Google Gemini powered learning assistant designed to help students understand and revise educational content more efficiently.

The project uses Generative AI to process educational content and generate concise and understandable summaries. This helps students save time and focus on important information during learning and revision.

2. BRAINSTORMING IDEAS

The following ideas were identified during the brainstorming process:

1. AI-based summarization of lengthy educational content.
2. Simple explanation of difficult topics.
3. Interactive question and answer support for students.
4. Generation of important points from study material.
5. Personalized learning assistance.
6. Automatic creation of revision notes.
7. Generation of practice questions and quizzes.
8. Keyword and concept extraction.

9. Topic-wise learning assistance.

10. Easy-to-use interface for students.

3. IDEA PRIORITIZATION

High Priority:

1. AI Text Summarization

This is the main functionality of the EduGenie project.

2. Simple Concept Explanation

Helps students understand difficult educational concepts.

3. Question and Answer Support

Allows students to clarify doubts related to their study material.

Medium Priority:

4. Important Point Extraction

Helps students identify important information for revision.

5. Personalized Learning

Can provide learning assistance based on individual student requirements.

6. Revision Notes

Helps students prepare quick study notes.

Low Priority / Future Enhancement:

7. Quiz Generation

8. Flashcard Generation

9. Student Performance Tracking

10. Personalized Study Plans

4. SELECTED IDEA

The primary idea selected for EduGenie is AI-powered educational text summarization using Google Gemini.

The user provides educational content to EduGenie. The system processes the content using the Gemini model and generates a concise and understandable summary.

5. EXPECTED BENEFITS

- Reduces the time required to read lengthy study material.
- Helps students identify important information.
- Makes revision easier.
- Provides concise and understandable content.
- Supports AI-assisted learning.
- Provides a foundation for future educational features.

6. FUTURE IDEAS

Future versions of EduGenie can include:

- AI question answering.
- Personalized study plans.
- Quiz generation.
- Flashcard generation.
- Topic-wise revision.
- Student performance tracking.

7. CONCLUSION

The brainstorming process helped identify several possible features for EduGenie. AI-based text summarization was selected as the primary feature because it directly addresses the problem of lengthy educational content and time-consuming manual revision.
