EMPATHY MAP

Project Name: EduGenie

Technology: Google Gemini Generative AI

Project Type: AI-Powered Learning Assistant

1. USER PERSONA

Primary User: Student

The primary user of EduGenie is a student who needs to understand, summarize and revise educational content within limited time.

2. SAYS

The student may say:

- "I have a lot of study material to read."
- "I need the important points quickly."
- "This topic is difficult to understand."
- "I need a quick summary for revision."
- "I don't have enough time to read everything."

3. THINKS

The student may think:

• Which information is most important?

• How can I reduce my study time?

• Can AI help me understand this topic?

• Will the summary contain the important concepts?

• Can I use the generated content for revision?

4. DOES

The student:

• Reads textbooks, notes and online educational resources.

• Searches for explanations of difficult topics.

• Creates notes and summaries manually.

• Revises important topics before examinations.

• Uses digital tools to support learning.

5. FEELS

The student may feel:

• Overwhelmed by lengthy study material.

• Confused when concepts are difficult.

• Time-pressured during examination preparation.

• Concerned about missing important information.

• Satisfied when difficult content is explained clearly.

6. PAINS

The major problems faced by the student are:

• Large amounts of study material.

• Time-consuming manual summarization.

• Difficulty identifying important information.

• Complex educational content.

• Limited time for revision.

• Repeated reading of the same material.

7. GAINS / NEEDS

The student needs:

• Quick and concise summaries.

• Simple and understandable explanations.

• Important points for revision.

• Reduced study and revision time.

• Easy-to-use AI learning assistance.

• Support for understanding difficult educational content.

8. USER EXPECTATIONS

Students expect EduGenie to:

- Provide clear and relevant responses.
- Make lengthy content easier to understand.
- Help them save time during revision.
- Provide useful study assistance.
- Offer a simple and student-friendly experience.

9. EDUGenIE SOLUTION

EduGenie addresses these user needs by using Google Gemini Generative AI to process educational content and generate concise and understandable learning material.

The system is designed to provide students with AI-assisted learning support and can be extended in the future with features such as question answering, quiz generation, personalized learning and revision assistance.

10. CONCLUSION

The empathy map shows that students mainly need simplicity, clarity and time-saving support while studying. EduGenie is designed around these needs by providing AI-powered assistance for understanding and revising educational content.
